WORK EXPERIENCE

Thirdware Solutions INC

Software Engineer

Mumbai, Maharashtra

Mar 2022 - Apr 2023

- Demonstrated knowledge of ERP product features and phases of development from requirement gathering to deployment with additional knowledge of SDLC and Agile methodologies.
- Built and programmed backend screens using Progress 4gl/OpenEdge Advanced Business Language.
- Designed, tested, and optimized maintenance screens, reports, and CIM programming.
- Documented application requirements, design specifications, and test plans based on the business requirement.

PROJECT EXPERIENCE

Professional Portfolio

Personal Project

Mumbai, Maharashtra

Apr 2023 - Apr 2023

- Developed a complete responsive portfolio website using React JS and Tailwind CSS
- Deployed the website using Netlify and incorporated Getform to keep track of all the form submissions.
- Implemented array destructuring, map functions, arrow functions, state management and other important concepts to improve code efficiency and readability.

CALCULATOR USING REACT JS

Personal Project

Mumbai, Maharashtra

Mar 2023 - Mar 2023

- Programmed a simple calculator application using React, incorporating concepts such as state management, event handling, and JSX syntax.
- Applied the concept of JSX and learned how is it different from regular HTML and Javascript.
- Edited the project using CSS properties to make the calculator more interactive.

TO-DO LIST USING JAVASCRIPT

Personal Project

Mumbai, Maharashtra

Jan 2023 - Jan 2023

- Used different JavaScript properties like DOM manipulation, arrow functions, and event listeners to add, update and delete tasks.
- Applied intermediate CSS properties to style the page, making use of different color codes and linear-gradient to make the page look interactive.
- Incorporated the concept of CSS variables to make the code more efficient and improve readability

RANDOM QUOTE GENERATOR USING JAVASCRIPT

Personal Project

Mumbai, Maharashtra

Jan 2023 - Feb 2023

- Designed a random quote generator using DOM manipulation, Math module, and event listeners in Javascript.
- Executed the concepts of iterating through objects and arrays in JavaScript to access different quotes.
- Created the basic markup using HTML and styled the page using different CSS properties.

TECHSTACK

TechStack:HTML, CSS, Javascript, React JS, Tailwind CSS, Bootstrap, Python, SQL, Progress 4gl

Familiar with:jQuery, SaaS, Github, Git, Getform, Netlify
